Jairam Hegde

Bengaluru, Karnataka
+91 8217856526 | jairamhegde002@gmail.com | github.com/Jairamhegde

Professional Summary

MCA student with strong fundamentals in data structures, algorithms, and database design. Builds backend systems and REST APIs using Python, FastAPI, and PostgreSQL, with experience in ETL pipelines, third-party API integration (Slack, GitHub, Gemini), and CI/CD with GitHub Actions. Projects are publicly available on GitHub.

Education

R V College of Engineering **Nov 2025 – Nov 2027 (Expected)**
Master of Computer Applications (MCA), CGPA: 8.68/10 *Bengaluru, Karnataka*

KLE Society's College of Computer Applications **Aug 2021 – Aug 2024**
Bachelor of Computer Applications (BCA), CGPA: 7.83/10 *Dharwad, Karnataka*

Experience

WiC Centre of Excellence, R V College of Engineering **Oct 2026 – Present**
Intern – Identity Security Posture Management (Vigil) *Bengaluru, Karnataka*

- Contributing to a team project that unifies **AWS IAM, Okta, and Active Directory** identity data to surface identity risk.
- Added JSON identity datasets and ingestion handling to improve correctness and robustness.

Technical Skills

Languages: Python, Java, SQL, HTML/CSS

Frameworks & Libraries: FastAPI, React, SQLAlchemy, APScheduler, pytest

Databases: PostgreSQL, SQLite

Cloud & DevOps: AWS, GitHub Actions (CI/CD), Git/GitHub

Concepts & Practices: Data Structures & Algorithms, REST API Design, ETL Pipelines, Unit Testing

Projects

InternIQ – Job Market Intelligence Platform | *FastAPI (Render), PostgreSQL (Aiven), React (Vercel)* **Jan 2026**

- Built a hybrid TF-IDF, cosine-similarity, and rule-based classifier for 7 job domains: 95% accuracy (confusion matrix), under 10 ms latency.
- Automated a daily GitHub Actions ETL pipeline loading 500–1,000+ postings into PostgreSQL; bulk inserts gave a 10x speedup.
- Built a React dashboard for domain and skill trends, with pytest coverage of the ETL, SQL, and classifier.

ResolveOps – Slack IT Helpdesk Backend | *Python, FastAPI, PostgreSQL, SQLAlchemy, REST API* **Jul 2026**

- Built a FastAPI + PostgreSQL backend integrated with Slack for ticket creation and tracking.
- Used the Gemini API to auto-classify and route tickets; added GitHub PR and commit updates to Slack channels.
- Designed an APScheduler SLA engine that auto-escalates ticket priority past a configurable threshold.

Relevant Coursework

Cloud Computing: AWS EC2, S3, CloudFront, RDS, and VPC subnets for cloud infrastructure projects.

Generative AI: LLM architectures and prompt engineering.

Certifications

AWS Fundamentals – Amazon Web Services for Beginners (Infosys Springboard)

Python Essentials 1 (Cisco)
